## CALIFORNIA HIGH SCHOOL EXIT EXAMINATION

### About Your Student and Parent Score Report

#### General Information

The top part of this report includes your student's scale scores and general information about your student.

The upper left section of this report contains your student's total test score for mathematics and English-language arts. Your student's test score for each subject is reported as a scale score, which ranges from approximately 250-450. A scale score of 350 is necessary to pass each subject.

The upper right section of this report contains your student's name, date of birth, student identification number (if provided by your school), school name, testing dates, and other general information.

#### Mathematics

The Mathematics section of the report describes how well your student performed on the mathematics portion of the test. "Your Total Mathematics Score" shows your student's mathematics scale score and whether your student passed the mathematics test.

Information also is provided for each of the five major areas (strands) tested: Probability and Statistics, Number Sense, Algebra and Functions, Measurement and Geometry, and Algebra I. This report shows the number of questions for each strand, as well as the number and percent of questions your student answered correctly.

#### English-Language Arts

The English-language arts section of the report describes how well your student performed on the English-language arts portion of the test. "Your Total English-Language Arts Score" shows your student's English-language arts scale score and whether your student passed the English-language arts test.

Information is also provided for each of the six major areas (strands) tested: Word Analysis, Reading Comprehension, Literary Response & Analysis, Writing Strategies, Writing Conventions (spelling, grammar, and punctuation), and Writing Applications. For the first five strands, the report shows the number of questions for each strand, as well as the number and percent of questions your student answered correctly.

The scores for the sixth strand, Writing Applications, show how well your student wrote two essays. One essay was written in response to a reading passage, and one essay was written in response to an assigned task. Each essay is scored on a four-point scale, with 1 being the lowest score a student can receive and 4 being the highest. Students also can receive a "non-scorable" (NS) score if they do not write enough to score, write off the topic, write illegibly, or write in a language other than English. Each essay is read at least twice by professionally trained scorers.

#### California Content Standards

All questions on this examination address *California Content Standards for Mathematics and English-Language Arts*. Adopted by the State Board of Education, these standards describe what students should know and be able to do in these subject areas. The *California Standards* addressed on the California High School Exit Examination (CAHSEE) are listed in the test blueprints that are available on the CAHSEE Web site listed below. Copies of selected test questions and related answer key are also posted on the CAHSEE web site. The *California Standards*, the test questions, related answer key, and other CAHSEE information are also available at your school site.

#### Important Information About the Test

Your student will need to receive a passing score of at least 350 for each subject to receive a high school diploma. Students will continue to have many opportunities, beginning in spring 2002, to pass this test. Keep in mind that all other graduation requirements still must be met to graduate.

#### Final Note

Your student's scores are based on the results of one test. Many factors must be considered when looking at your student's academic achievement, including other test scores, grades, student's work, and teacher evaluations. You should contact your student's school for more information about your student's current academic performance, and ways you can help him or her succeed.

2-5 In developing the CAHSEE, several questions were tried out for each of the content standards. The standards below are ones where student performance was particularly low in the tryouts. We would like to know in which courses, if any, these standards are taught. For each standard, please complete the following steps:

- 1 Decide whether it is taught in one or more of the courses offered in your district. If it is not, mark "Not Taught in Any Courses" and move to the next standard.
- 2 If it is taught, identify up to three courses from the list below where the standard is taught. For each course, mark the letter, A through K, which corresponds to the course title from the list. There also is space to add the title of an additional course where the standard is taught.
- 3 In the first two columns, mark one choice to indicate whether the standard is **partially** or **fully** taught in this course.
- 4 In the last two columns, mark whether the course is only taken by **some students** (1/4 to 3/4) or is taken by **most students** (more than 3/4). If fewer than 1/4 of your students take this course, do not mark either of these bubbles.

**SECTION 3: About Mathematics and State Content Standards**

**DIRECTIONS:** Section 3 concerns the ways in which students are prepared to pass the mathematics standards tested by the CAHSEE. English-Language Arts teachers should skip this section.

---

**3-1** Indicate respondent for this section of the survey.

- ☐ Individual—Mathematics Teacher
- ☐ Group—Mathematics Department Members (How many? \_\_\_\_\_ )
- ☐ Other (specify) \_\_\_\_\_

**3-2** Based on your knowledge of the CAHSEE, at what level does your school's current curriculum cover the mathematics standards tested by the CAHSEE?

- ☐ Less than 1/4
- ☐ 1/4 - 1/2
- ☐ About 3/4
- ☐ Almost all
- ☐ No knowledge of CAHSEE mathematics standards

**3-3.** What plans does your district or school have to increase coverage of the mathematics content standards assessed by the CAHSEE? (Mark all that apply.)

- ☐ Committee initiative to recommend modifying curriculum
- ☐ Inservice training to modify instructional practices
- ☐ Recommend changing graduation requirements to include mathematics courses that enhance student success on the CAHSEE
- ☐ None - Mathematics content standards already fully covered
- ☐ Hire more algebra teachers
- ☐ Other (specify) \_\_\_\_\_

**3-4.** Based on your knowledge of the mathematics standards assessed by the CAHSEE, what percentage of your current 9th grade students do you think will meet these standards by the end of 10th grade?

- ☐ Fewer than 50%
- ☐ 50-74%
- ☐ 75-95%
- ☐ Greater than 95%
- ☐ Unsure

3-5 In developing the CAHSEE, several questions were tried out for each of the content standards. The standards below are ones where student performance was particularly low in the tryouts. We would like to know in which courses, if any, these standards are taught. For each standard, please complete the following steps:

- 1 Decide whether it is taught in one or more of the courses offered in your district. If it is not, mark "Not Taught in Any Courses" and move to the next standard.
- 2 If it is taught, identify up to three courses from the list below where the standard is taught. For each course, mark the letter, A through K, which corresponds to the course title from the list. There also is space to add the title of an additional course where the standard is taught.
- 3 In the first two columns, mark one choice to indicate whether the standard is **partially** or **fully** taught in this course.
- 4 In the last two columns, mark whether the course is only taken by **some students** (1/4 to 3/4) or is taken by **most students** (more than 3/4). If fewer than 1/4 of your students take the course, do not mark either of these bubbles.
